

Law firms appreciate the value they receive from doing business with Article One Partners (AOP) by tapping into our global research community, expert researchers and professional services team. Our law firm partner program is a partnership between your firm and AOP, leveraging expert legal counsel and a state-of-the-art research model.

AOP has research solutions to support all your patent prosecution and litigation needs.

How we work together

- 1 Join the AOP Law Firm Partner Program
- 2 Contact us to discuss a specific project
- 3 Launch a public or private search
- 4 Review real time results in AOP Connect

*“We needed to hit a home run.
We needed the best of the best.
The best that could possibly be
done was to hire AOP.”*

Fox Rothschild Legal Team

Benefits you receive

In addition to access to the best IP research community, the AOP law firm partner program offers much more:

Preferred pricing – start out with discounts on all searches. The more searches you run, the higher your discount level.

AOP Connect – continuous access to a powerful online portal for reviewing search responses, interacting with researchers and colleagues, and viewing key statistics related to all your projects in real time. *Plus free uploads of non-AOP patent references.*

Monthly newsletter – each month you will receive an e-zine featuring relevant industry and technology trends and developments.

Promotional marketing – AOP will highlight your firm’s achievements and services by calling out wins, awards and recognition through the AOP social media channels, website and newsletters.

Referral business – AOP will connect you with new and expanded business opportunities by sourcing and facilitating introductions to clients and projects that are in need of your IP legal support.

Quarterly reviews – AOP will provide quarterly reports containing research status and statistics.

About Article One Partners

AOP is an intellectual property (IP) research company that pioneered the use of crowdsourcing to the varied needs of IP practitioners worldwide. Our research products are designed to meet the specific needs of our diverse range of clients, whether those are for the defense, innovation or monetization of their IP assets. AOP leverages various combinations of resources, along with proprietary research processes, to deliver optimal and cost-effective research for every project.
